

## **Future Study Buddy System Developments**

### **Version 1.0**

- Include an “Accept/decline Study Buddy” feature for the system to detect that one final match has been selected by the student.
- Include a private chat function that appears after a student has accepted a study buddy match.
- Include a “View Progress” function for a student to view the total number of hours they spent studying and the number of people they connected with. This can help contribute to a tangible value of a greater sense of community.
- Expand the number of suggested study buddies at a time (current number of suggested study buddies is limited to five).
- Include a “Schedule a Study Session” function to allow students the flexibility to schedule study sessions around their schedule whenever is most convenient.
- Create a separate web hosting domain.
- Outsource security testing.
- Perform beta testing.
